

1,550 Acre Site Roseville Ca 2004 –2005
CLEAR CREEK SYSTEMS

Installed 2—1,800 GPM Sediment Removal Systems for a total of 3,600 GPM. System was installed and operative in less than 10 days after order just prior to the Christmas Holiday.

System Design included Eight Retention Basins, Settling Cells, 18,000 ft of Piping, 18 Pumps, 6 Sand Filters, 6 Cartridge Filters, Polymer Injection, Effluent Testing, 24 hour Monitoring During Rain Events, All Terrain Vehicles, and Portable Generators. Client was able to stay in compliance with NPDES Permit and SWPPP Regulations by utilizing Clear Creek Systems Best Available Technology and BMP's. Discharge From The Site Was Kept Far Below The Discharge Requirements Set By The CSWQRCB in its Basin Plan for Storm Water Discharge
